Buy/sell spread³	+0.30% / -0.30%
Strategy FUM	\$247.8 M

Fund Features

Attractive income: The Fund aims to provide a stable income stream for investors by seeking to offer monthly distributions.

Focus on downside protection:⁴ Ares believes protecting principal is key to attractive performance and therefore places emphasis on dampening volatility and minimising defaults.

Dynamic asset allocation: The Fund has the ability to dynamically allocate capital based on the best relative value opportunities across industries, issuers and regions within the credit spectrum.

Diversification:⁵ The Fund provides access to investment opportunities and asset classes which are generally unavailable to individual investors.

Leading global investment team: The Fund offers access to a leading global investment team with 20+ years of experience investing in global credit markets. The experienced management team applies an integrated and collaborative approach using the scale and power of the platform seeking to deliver compelling risk-adjusted returns through market cycles.

Asset Class Allocation⁶

Key Attributes	Fund	Change from 31 Dec 2024
Number of issuers	358	+8
Weighted Average Spread (L+)	281	-
Current Yield (AUD-Hedged) ⁷	7.12%	-0.39%
Yield to Worst (AUD-Hedged)	6.91%	-0.22%
Current Yield (Unhedged) ⁷	7.07%	-0.28%
Yield to Worst (Unhedged)	6.88%	-0.08%
Duration	1.16	+0.14
Spread Duration	3.71	-
Weighted Average Credit Quality ⁸	BB	-
Total Investment Grade Exposure	51.85%	-0.77%

Top 10 Industry Exposure (% of Total Market Value)⁹

³ Source: Ares. During normal market conditions, bid/ask spreads have averaged 25 -100bps, however, during periods of volatility, we have observed spreads widen out to 300-400bps.

⁴ References to "downside protection" or similar language are not guarantees against loss of investment capital or value.

⁵ Diversification does not assure profit or protect against market loss.

⁶ The Fund's allocation is based on recent market conditions and is subject to change based on future market conditions at the time of investment and may differ materially from that set forth herein.

⁷ Yield is an attribute of underlying investments and does not represent a return to investors

⁸ Reflects the risk-adjusted weighted average higher of rating using Moody's, S&P, and Fitch.

⁹ Credit Suisse Industry Distribution. Excludes CLO debt, CMBS and cash.

Growth of \$10,000 Since Inception (Net of Fees)

Past performance is no indication of future performance. Represents performance of a hypothetical \$10,000 investment made in this fund from the inception date. There is no guarantee of future results and this may not provide adequate basis for evaluating the performance of the Fund over varying market conditions or economic cycles. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance data quoted. The Fund's inception date is 1 May 2020.

Monthly Distribution Rate

Past performance is no indication of future performance. There is no assurance monthly distributions paid by the Fund will be maintained at targeted level or paid at all. Calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.

Market Commentary

In January 2025, global risk asset performance was strong alongside positive macroeconomic signals and a solid start to corporate earnings season.

U.S. high yield bonds posted a 1.38%¹ return, despite U.S. Treasury volatility at the start of the month and spreads tightening around 24 basis points. Over the month, 27 bonds priced for \$23.0bn, which compares to the average 2024 monthly volumes of \$24.1bn, signalling positive momentum².

U.S. leveraged loans returned 0.72%³ in January, the 20th consecutive month of positive performance for the asset class, as a result of an attractive carry profile and a sound technical backdrop. From a demand perspective, floating rate assets continued to experience positive retail inflows while CLO formation remained strong. The primary market was active with \$200bn of volume dominated by repricing's and refinancing.²

CLO debt securities posted positive returns during the month with all ratings tranches generating gains.⁴ January saw steady CLO issuance, as 81 U.S. CLOs priced totalling \$40.1bn, driven in tandem by refinancing and reset activity.⁵

U.S. investment grade bonds returned 0.53%⁶ in January, amid a further stabilization in treasury yields.

In Europe, high yield bonds and leveraged loans returned 0.65%⁷ and 0.84%⁸ in January, respectively. Despite volatility in bond markets with the return of the Trump administration leading to uncertainty over policies such as trade and tariffs, European loans and high yield were largely immune as spreads grinded modestly tighter over the month, while the asset class continued to be supported by an attractive carry profile.

Market Outlook⁹

Despite macro volatility around trade policy and tight spreads, leveraged credit markets have remained firm thus far in February due in part to a relatively attractive income profile coupled with a benign default environment. In the U.S., rates are expected to remain higher for longer, with the most recent jobs report supporting the Federal Reserve’s (“Fed’s”) “wait and see” approach to further cuts and a divergence from the ECB, who cut rates in January. The other key factor shaping Fed decisions is inflation, which remains a source of uncertainty for many market participants due to rhetoric from the Trump administration. As anticipated, tariff risk was a source of volatility in January and drove higher near-term inflation expectations. While we are skeptical about tariffs being implemented as initially communicated, the impact on market volatility and asset prices has been undeniable. To that end, we continue to actively assess our portfolios for tariff risk and seek to take advantage of opportunities where there is a disconnect between perception and reality. With market conditions being tight, we view this elevated macro volatility as both a risk and an opportunity and believe the potential to add value through tactical asset allocation and disciplined credit selection will only increase in the months ahead.

Fund Commentary

The Ares Global Credit Income Fund (“AGCIF” or the “Fund”) returned 0.86% gross and 0.79% net for the month of January. The allocation to CLO debt was the largest contributor to returns in January, primarily driven by a strong underlying technical backdrop. Both bank debt and bonds contributed positively to portfolio performance as well, largely due to attractive income in loans and strong credit selection in higher beta names.

Regarding positioning, we maintained a slightly higher risk posture in January, similar to prior months, and kept our fixed vs floating positioning consistent month-over-month. Additionally, we continued to prioritize identifying opportunities arising from modest volatility in the market due to developments around potential policy changes. From a sector standpoint, we continue to hold a defensive posture, with a preference towards non-cyclical sectors with favorable supply-demand dynamics and solid earnings growth, along with credits that provide stable cash flows. We remain underweight sectors most exposed to cyclical and consumer headwinds, while carefully monitoring the broader impact of macroeconomic factors on our portfolio companies and lending conditions more broadly. With respect to structured credit, we are maintaining our exposure to CLOs and continue to favor Triple-B paper with top tier managers. From a geographical perspective, we are keeping European exposure consistent, and remain neutrally positioned from a fixed versus floating rate standpoint in the region. Overall, we believe we are well-positioned to navigate the road ahead and remain focused on security selection, particularly as single-name credit dispersion increases.

The ratings noted herein relate only to Ares Global Credit Income Fund and may not be representative of any given client's experience and should not be viewed as indicative of Ares' past performance or its funds' future performance. All investments involve risk, including loss of principal. Ares has provided compensation in connection with obtaining or using these ratings. Please refer to endnotes for additional important information.

Index Definition & Disclosure:

The Bloomberg AusBond Bank Bill Index is engineered to measure the Australian money market by representing a passively managed short term money market portfolio. This index is comprised of 13 synthetic instruments defined by rates interpolated from the RBA 24-hour cash rate, 1M BBSW, and 3M BBSW.

The Bloomberg AusBond Bank Bill Index is provided for illustrative purposes only and not indicative of any investment. Any comparisons herein of the investment performance of the Ares Global Credit Income Fund to the index are qualified as follows: (i) the volatility of such index will likely be materially different from that of the fund; (ii) such index will, in many cases, employ different investment guidelines and criteria than the fund and, therefore, holdings in such fund will differ significantly from holdings of the securities that comprise such index and such fund may invest in different asset classes altogether from the illustrative index, which may materially impact the performance of the fund relative to the index; and (iii) the performance of such index is disclosed solely to allow for comparison on the referenced fund's performance to that of the fund's performance benchmark. Comparisons to indices have limitations because indices have risk profiles, volatility, asset composition and other material characteristics that will differ from the fund. The indices do not reflect the deduction of fees or expenses. You cannot invest directly in an index. No representation is being made as to the risk profile of any benchmark or index relative to the risk profile of the fund presented herein. There can be no assurance that the future performance of any specific investment, investment strategy, or product will be profitable, equal any corresponding indicated historical performance, or be suitable for a portfolio.

The rating issued for Ares Global Credit Income Fund – assigned October 2024 are published by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445 (Lonsec). Ratings are general advice only, and have been prepared without taking account of your objectives, financial situation or needs. Consider your personal circumstances, read the product disclosure statement and seek independent financial advice before investing. The rating is not a recommendation to purchase, sell or hold any product. Past performance information is not indicative of future performance. Marketing Communication

This is a marketing communication. Please refer to the legal documentation of the Fund before making any final investment decisions. This is not an offer to sell, or a solicitation to purchase, any security or other financial instrument, or a solicitation of interest in any fund, account or investment strategy.

Contents of the Communication

Any offer or solicitation with respect to any securities that may be issued by any investment vehicle managed or sponsored by Ares Management or one of its affiliated entities (each an "**Ares Fund**") will be made only by means of a definitive offering memorandum (as modified or supplemented from time to time, a "**Memorandum**"). You should refer to the Memorandum and/or limited partnership agreement ("**Partnership Agreement**") and any other subscription documents relating to the relevant Ares Fund before making any investment decision.

The Memorandum, Partnership Agreement and subscription documents will contain complete information concerning the rights, privileges and obligations of investors in the relevant Ares Fund. The information contained in any such Memorandum, Partnership Agreement or subscription documents will supersede this communication and any other marketing materials (in whatever form) issued or communicated by Ares Management.

This communication contains information about Ares and certain of its personnel and affiliates and the historical performance of certain Ares Funds and/or investment vehicles whose portfolios are managed by Ares. This information is supplied to provide information as to Ares' general portfolio management experience. Neither Ares nor any third party makes any representation or warranty (express or implied) with respect to the information contained herein (including, without limitation, information obtained from third parties) and Ares expressly disclaims any and all liability based on or relating to the information contained in, or errors or omissions from, this communication; or based on or relating to your use of the communication; or any other written or oral communications transmitted to you in the course of your evaluation of Ares or a potential investment in any Ares Fund.

The content of this communication should not be construed as legal, tax, or investment advice. Regarding sustainability-related aspects of the investment included herein the decision to invest in the Fund should take into account all the characteristics or objectives as described in the legal documentation of the Fund.

Recipient

These materials are not intended for distribution to, or use by, any person in any jurisdiction or country where such distribution or use would be contrary to law or regulation.

Forward-Looking Statements

This communication may contain "forward-looking" statements that are not purely historical in nature. Any such statements are based upon estimates, projections, plans and assumptions about future events or conditions (not all of which will be specified herein). They are intended only as illustrations and by their nature are uncertain. No representations are made as to the accuracy of such statements. Not all relevant events or conditions may have been considered in developing such statements and assumptions. The achievement of results and objectives is dependent upon a multitude of factors, many of which are beyond the control of Ares and/or any referenced portfolio company. The statements may not consider or address all aspects of a referenced portfolio investment, including aspects that might be material or important. You must not rely upon any forward-looking statement contained in this communication, and you acknowledge and agree that you shall have no claim at law or in equity by virtue of anything contained in or omitted from any such statement. Past performance is not indicative of future results. There is no assurance that an Ares Fund will be able to generate returns for its investors (as stated herein or otherwise).

Third-Party Information

Certain information contained in this communication has been obtained from sources outside Ares, which in certain cases have not been updated through the date hereof. While such information is believed to be reliable for purposes used herein, no representations are made as to the accuracy or completeness thereof and none of Ares, its funds, nor any of their affiliates takes any responsibility for, and has not independently verified, any such information.

Through its range of institutional and retail structures, coupled with excellent client service and educational resources, AWMS helps investors diversify their portfolios with private market solutions that seek to deliver consistent, long-term growth. For more information, please visit www.areswms.com.au.

Summary of Risk Factors

An investment in Ares Global Credit Income Fund (“AGCIF” or the “Fund”) entails a significant degree of risk and, therefore, should be undertaken only by investors capable of evaluating the risks of the Fund and bearing the risks it represents. Below is a non-exhaustive list of risk factors and conflicts of interest that should be considered before making an investment in the Fund. **Prospective investors should carefully consider the following and make reference to the detailed risk factors and all other information contained in the Fund’s Constitution, Product Disclosure Statement (“PDS”) and Target Market Determination (“TMD”). Prospective investors should consider obtaining independent financial advice to determine if an investment in the Fund is appropriate in light of their financial situation, objectives, and needs.**

No Assurance of Portfolio Investment Return. There can be no assurance that the Fund will be able to generate returns for its investors in a timely manner or at all, that the Fund’s investment objective will be achieved, or that such returns will be comparable to the Fund’s benchmark. Portfolio investments which may not achieve their expected operational objectives and may experience substantial fluctuations in their operating results. A prospective investor could lose the entire amount of its contributed capital.

Past Performance Not Indicative of Future Results. Past performance of the investment manager, sub-adviser, and their respective investment professionals with respect to any fund, strategy or other portfolios, investment vehicles or accounts may be not indicative of the future results that the Fund will achieve.

Any Use or Indication of Target Returns are not Guarantees of Performance. Target returns are not a reliable indicator of future performance, and no guarantee or assurance is given that such performance objectives will be achieved. Actual results may differ materially from the target returns. Any investment involves significant risk, including the loss of principal. The target returns are provided solely to evaluate the return potential and risk profile of an investment in the Fund. Target returns are not based on modelled expectations or specific criteria and assumptions, but rather what we believe we may achieve given current market conditions, which may differ from actual events or conditions.

Asset backed securities risk. The value of asset backed securities are affected by the value and cashflow of the underlying collateral. Asset backed securities are subject to more structural and legal complexities than other fixed income securities. Credit risk, liquidity risk and interest rate risk could impact the timing and size of the cashflows paid by the securities and could negatively impact the returns of the securities.

Collateralised loan obligation (CLO) risk. CLOs issue securities in tranches with different payment characteristics and different credit ratings, and different risk of loss or deferral or non-payment of interest. CLO tranches may have higher ratings and lower yields than the underlying securities. CLO tranches can experience substantial losses. The Fund may not receive back the full amount of its investment in a CLO.

Fixed income security risk. Investments in fixed income securities may experience a decline in income where market interest rates are falling and securities are reinvested at a lower yield. Investors are also exposed additional risks which can result in significant variability in investment returns and a loss of income or capital value, and risks associated with the terms and conditions of the individual financial security.

Credit risk. Issuer of fixed income securities may be unable or unwilling to make interest and/or capital repayments in full and/or on time or may not meet other financial obligations. Fixed income securities are subject to legal, political, macro-economic, industry and business risks leading to a loss of capital or interest payments. Changes in credit ratings may lead to volatility in the security’s secondary market price.

High yield bond risk. High yield bonds rated may be more volatile than higher-rated bonds of similar maturity. High yield bonds may be subject to greater levels of credit default. High yield bonds may be less liquid and more difficult to sell at an advantageous time or price or to value than higher-rated bonds.

Market risk. The Fund may experience losses due to factors that result in market volatility and disruption and affect the overall performance of the financial markets, such as changes in spreads, macro-economic, regulatory, social and political conditions, weather events, terrorism, changes in technology, the environment and market sentiment, and pandemics and other widespread public health emergencies.

Derivative risk. The use of derivatives may magnify losses to the Fund. The Fund may not be able to meet payment obligations as they arise, or the counterparty may fail to perform its contractual obligations.

Collateral risk. The Fund may be required to deliver collateral to a derivative counterparty or clearer, hence exposed to risks in respect of that collateral including the credit risk of the counterparty or clearer.

Counterparty risk. The Fund is, to a certain extent, reliant on external counterparties in connection with its operation and investment activities. The counterparty may fail to perform its contractual obligations, and any collateral lodged with counterparties related to these derivatives may also be at risk. This may result in the investment activities of the Fund being adversely affected.

Interest rate risk. The market price of fixed income securities (such as bonds) can be affected by movements in interest rates.

Currency risk. The value of investments denominated in foreign currencies may fluctuate in Australian dollar terms because of fluctuations in currency exchange rates. Hedging strategies could reduce the potential for increased gains.

Fund risk. Investors are exposed to risks associated with the Fund, such as termination or changes to fees. The value or tax treatment of an investment, or the effectiveness of the Fund’s strategy may be adversely affected by changes in government policies, regulations, laws, generally accepted accounting policies or valuation methods. Investing in the Fund may give different results from holding the underlying assets directly.

Liquidity risk. The Fund may not have adequate cash resources to meet its short-term financial commitments as they fall due (including redemption payments). Liquidity risk may occur due to the absence of an established market or a shortage of buyers for an investment, or events causing volatility and declines in markets. Certain investments may become illiquid during times of market stress. Large withdrawals may have a detrimental impact on asset selling price. Withdrawals may be suspended suspend or otherwise restricted.

Withdrawal risk. If a situation occurs where the assets that the Fund invests in are no longer able to be readily bought and sold, or market events reduce the liquidity of a security or asset class, withdrawals from the Fund may take significantly longer than the generally applicable timeframe and may need to be suspended.

Operational risk. The day-to-day operations of the Fund may be adversely affected by circumstances beyond its reasonable control, such as a failure of technology or infrastructure, pandemics and other widespread public health emergencies or natural disasters. A breakdown of administrative procedures and risk control measures may also adversely affect the operation and performance of the Fund.

Service provider risk. The Fund is subject to risks in using external service providers such as fund administrator, custodian, registry provider and any sub-advisory managers, and the risk that they default in the performance of their obligations or seek to terminate the services, which may adversely affect the investment activities and other functions of the Fund.

Conflicts of Interests. Ares manages various funds and strategies and the management of these funds and strategies can give rise to conflicts of interest. There can be no assurance that Ares and the Investment Manager will identify or resolve all conflicts of interest in a manner that is favourable to the Fund. Please refer to the PDS for additional important information related to these conflicts, and see Ares’ Form ADV Part 2A, which is available at: https://files.adviserinfo.sec.gov/IAPD/Content/Common/crd_iapd_Brochure.aspx?BRCHR_VRSN_ID=903637.
